Submission on the Boobyalla River Catchment Water Management Plan and Tomahawk River Catchment Water Management Plan

Please find attached the Tasmanian Conservation Trust's submissions on the Boobyalla River Catchment Water Management Plan and Tomahawk River Catchment Water Management Plan.

One additional recommendation the TCT wishes to make, which is relevant to both plans, is that the Department of Primary Industries, Parks, Water and Environment urgently needs to employ a person with expertise in water management planning. The numerous serious and fundamental flaws in these plans and other which we have commented on clearly show a lack of expertise in this area and we urge the DPIWPE to make this a high priority.

Yours sincerely

Peter McGlone
Director
